EDUCATION

Massachusetts Institute of Technology **Cambridge, MA**

Candidate for B.S. in Computer Science (Course 6-3) and Math (Course 18) • 5.0/5.0 GPA Expected 2023

Current Courses: Intro to Algorithms, Real Analysis, Intro to Machine Learning, Minds & Machines

Past Courses: Differential Equations, Elementary Discrete Math for Computer Science

Poolesville High School **Poolesville, MD**

Science, Math, and Computer Science Magnet Program • 3.96/4.0 GPA, 4.82/4.0 WGPA • 36/36 ACT May 2019

Relevant Courses: Fundamentals of Computer Science (Python), Algorithms & Data Structures (Java), Networking, Principles of Engineering, Vector Calculus, Mechanics, Electricity & Magnetism, Single-Variable Calculus, AP Statistics

EXPERIENCE

Machine Learning Research at the Health Analytics Group at IBM Research **Cambridge, MA**

Undergraduate Researcher January 2019 – Present

- Developed a distance dependent Chinese Restaurant Process Gibbs sampler for 3D mesh segmentation in Python

Bioinformatics Research at Fondazione Bruno Kessler (FBK) **Casez, TN, Italy**

WebValley 2019 Research Fellow June 2019 – July 2019

- Built a comprehensive predictor of cardiovascular diseases using convolutional neural networks, U-Nets, autoencoders, Siamese networks, and other machine learning networks on ultrasound images, patient data, and the euroSCORE metric
- Led a team of four in developing preprocessing and analysis algorithms using UMAPs, ROCs, and the f1 score

Machine Learning Research at the Medical Imaging Lab at George Washington University (GWU) **Washington, DC**

High School Researcher July 2018 – October 2018

- Independently developed a fast, sensitive, and non-invasive state-of-the-art machine learning algorithm to detect breast tumors in mammograms using fully convolutional neural networks programmed in MATLAB

Software Engineering Client Project **Poolesville, MD**

Project Manager and Software Developer March 2017 – June 2017

- Designed, programmed, and implemented an attendance log software in Java to ease front office processes at school
- Authored proposal (SPMP) and testing requirement document (SRS) to specify deliverables and deadlines for the project

LEADERSHIP

Women Business Leaders (WBL) **Cambridge, MA**

Professional Development Chair for Entrepreneurship February 2020 – Present

- Provide entrepreneurial resources, coordinate talks, and host workshops relating to startups and entrepreneurship at MIT

FIRST Robotics Competition (FRC) Team 4099 **Poolesville, MD**

Mentor and Whole Team Captain October 2016 – Present

- Provide mechanical and programming expertise to facilitate new team member learning
- Led a team of over 60 students in applying for corporate sponsorships and designing, prototyping, and building a $30,000 World Championship-level robot to participate in the year's competition

Girls in Engineering/Girls Just Want to Compute **Germantown, MD**

Founder and Teacher April 2017 – Present

- Design and deliver curriculum about various engineering and computer science concepts for K-8 girls interested in STEM
- Wrote a grant proposal and was awarded $6.5k in funding from the Maryland State Department of Education

SKILLS AND INTERESTS

Programming (advanced): Python, Java, MATLAB, HTML, CSS, Jupyter, GitHub, TensorFlow, Keras, NumPy, Pandas

Programming (familiar): C, C++, Arduino C, Mathematica, JavaScript, PyTorch, React, Kotlin, Caffe

Design: Figma, InDesign, Photoshop, Premiere Pro, After Effects, SOLIDWORKS, OnShape

Interests: Entrepreneurship, Graphic Design, UI/UX, Healthcare, Dance, Classical Piano, Skateboarding, Spanish
